

September 11, 2015
Meeting Notice
And Association News

P.A.C.I.A.

Pennsylvania Auto Crime Investigator's Association

Join us Friday, September 11, 2015 at 10 am for the presentation of
**Event Data to Autonomous Vehicle Technologies - Where we are, Where we're Going
and How the Technology and Data is Used to Help in Reconstructing Collisions.**

New technologies to aid in improving safety and reducing driver work-load have been developed, from cruise-control and anti-lock brakes to park assist and automatic braking. These systems rely on technology to increasingly automate the driving experience. We'll discuss these systems, and what's coming in the future that could be part of your investigations.

Presented by R. Scott King, BMSE and Robert S. Kinder, BSME of

**Forensic Consulting,
Technology & Animations**

Unparalleled experience, period.
